

2021

# STRUCTURAL HACKATHON

---

OCTOBER 6TH - OCTOBER 9TH, 2021

## BUILD YOUR PROTOTYPE

Having a hard time dedicating time to developing smart structural engineering solutions? This is your opportunity to spend a concentrated effort to develop a prototype for your company.

**Build a prototype in days, not months**, with the SkyCiv engineering team on hand and ready to help, you'll unlock code blocks faster.

## SAVE DESIGN HOURS + COST

Many of our API users are already saving design time and costs, providing **more streamlined design services to their clients**. Here's an example of how we helped one engineering firm reduce their design time by 80%, resulting in the following (per design) savings:

### Average Design Cost

Building for the  
**FUTURE**

# SHOWCASE TO 80,000+ ENGINEERS

At the end of the Hackathon, you'll have the opportunity to showcase your solution to the SkyCiv team and other participants during Demo Day. You'll receive instant feedback and suggestions to help you shape your solution.

**The top 5 solutions will be featured** in our weekly newsletter, social media platforms and website, reaching more than 80,000 engineers around the world.

Note: this is optional, and if requested, your solution can remain confidential.

# UPSKILL YOUR WORKFORCE

With the support of the SkyCiv Team, your engineers can attend workshops and be upskilled in programming, the use of APIs, and design automation to help your company be more efficient. Learn from some of our most experienced and knowledgeable engineers/programmers, all for free.

# OUTCOMES

- A workable, useful solution/prototype
- Help your team design more efficiently
- Up-skilling in programming with workshops
- Stay up to date with technology
- Showcase and market your solution to engineers
- Engage and meet others in the industry with like-minded interests

Building for the  
**FUTURE**

In a world where things are changing rapidly everyday, it's important to stay ahead of the curve.

By spending a bit of time now to develop innovative and smart technology, your company can move forward with great speed and efficiency.
